How to fail to cook muffins (explained)

Recipe for 8 Muffins

I recommend no one to try this recipe, interestingly, the muffins turned out white and didn't taste good.

Ingredients:

-200g flour

-2 tsp baking powder

-100g sugar

-1 tsp vanilla sugar

-2 eggs

-250ml milk

Baking pan to put the batter in for baking.

Crack 2 eggs into the bowl and then mix them.

Then mix this egg mixture with vanilla sugar and sugar.

Mix it with milk, and then mix this mixture with flour, which will then be mixed with baking powder.

Mix this mixture with chocolate, then, unlike me, carefully pour it into the baking molds.

And then bake for 30 minutes at 180°C in the oven.

And afterward, you might enjoy it, but probably not 😞
